

ISP Group Your Digital Assets Partner

We offer institutional grade digital assets trading, custody, staking, and much more within the framework of a FINMA regulated Swiss securities firm. You can rely on the highest degree of security and the comfort that your tokens are handled by a regulated Swiss financial institution with a compliant set up according to the Swiss legislation.

Custody Solution

Institutional Grade Custody:

We offer a banking grade warm storage (Multi-signature Transactions) custody solution. Clients receive their own wallets; assets are not pooled with any other assets. Staking to non-custodial validators so your assets will not leave our custody.

Products and Services

Digital Wealth Management:

Manage all your wealth in one place you can trade securities and derivatives, as well as purchase, hold and stake your crypto assets. View traditional and digital assets in the same portfolio.

Tokenization

We enable seamless access to liquidity in the world of tokenized assets. While we don't tokenize assets ourselves, we partner with leading platforms to support the end-to-end tokenization journey. As a recognized liquidity provider on BX Digital (<https://bxdigital.ch/>) — a FINMA-regulated Swiss stock exchange — we help drive the efficient trading of diverse digital instruments in a secure and compliant environment.

Trading Access:

- Seamless access to tokenized assets as a recognized liquidity provider on BX Digital
- Directly execute trades on exchange through our partnership with Taurus SA. Custody and safekeeping of all assets within ISP's custody.
- Sponsored access to the trading venue RULEMATCH for institutional clients, to directly trade BTC, ETH, and USDC, facing only regulated counterparties and institutional market makers.

Crypto Baskets:

One-stop-shop for Product Management. We provide the entire value chain to set up, issue and manage your products, whether you issue tracker certificates or run cross-asset strategies.

Crypto Payments:

Skip the middlemen and facilitate your transactions using crypto. Simply convert your assets with us as the bridge between the worlds of crypto and fiat.

Token Support

We carefully select the tokens we support for trading and custody to provide the most relevant investment universe to our clients, and to reduce the risk of fraudulent or non-serious projects within the world of crypto.

We provide **access to 50+ tokens on 10+ blockchains**, including:

Our Partners

TAURUS
Staked

Lukka
